

TECHNICAL DATA SHEET

KYNAR 500[®] POWDER

FLUORINATED HOMOPOLYMER POWDER

Kynar 500[®] FSF[®] PVDF resin is used by leading coating formulators as a base vehicle in long-life coatings for aluminum, galvanized steel and aluminized steel.

Today, Kynar 500[®] FSF[®] PVDF resin-based metal coatings provide billions of square feet of protection against weathering, aging and pollution on commercial, industrial, institutional and residential buildings around the globe. The capability of Kynar 500[®] resins to deliver long-term durability is unparalleled in the industry. Introduced in 1965, Kynar 500[®] resin-based coatings were the original high performance finishes for architectural metal. According to a recent survey, Kynar 500[®] finishes are still the architect's first choice.

DESIGNATION

PVDF

DELIVERY FORM

- Powder

SPECIAL CHARACTERISTICS

- Flame & smoke

Headquarter: Arkema France
420, rue d'Estienne d'Orves
92705 Colombes Cedex – France
