

# KYNAR AQUATEC®

## TECHNICAL DATA SHEET

# KYNAR AQUATEC® FMA-12

## FLUORINATED POLYMER SUSPENSION

KYNAR AQUATEC® is an innovative platform of emulsions, which are used by paint formulators to make premium weatherable water-based coatings. Coatings formulated with these emulsions can provide the durability and performance of traditional KYNAR 500® based coatings. They can easily be applied to a variety of substrates, including metals, plastics, wood, concrete, textiles, and previously painted surfaces. Now, the extreme weatherability of a KYNAR 500® based coating is available in a VOC-compliant, field or factory applied, ambient air-dry system. Additional benefits include tremendous resistance to dirt pick-up, outstanding water repellency, and high initial and long-term Total Solar Reflectance and Emissivity.

### DESIGNATION

PVDF

### MAIN APPLICATIONS

- Automotive And Transportation
- Protective Coating
- Paints
- Coil

### DELIVERY FORM

- Latex

### TRANSFORMATION PROCESSES

- Injection Molding

### SPECIAL CHARACTERISTICS

- Flame & smoke
