

TECHNICAL DATA SHEET

ORGASOL® 2002 D NAT COS

ULTRAFINE POLYAMIDE POWDER

ORGASOL® 2002 D NAT COS is a micro-porous spheroidal powder characterized by a great affinity for the skin, providing very good remanence, and a velvety feeling. **It is recommended to improve spreading, and to provide easy, glideon application of powders and oil continuous emulsions including foundations.** It leaves a natural transparent powder veil on the skin. For oil continuous sun care products, it improves the dispersion of sun filters at the microscopic level, reducing the whitish residual finish and increasing the effective SPF. It is also recommended for waterproof mascaras, as volumizing agents for eyelashes.
